FIERA MILANO - RHO • 8 - 10 MAGGIO 2013

Challenges for smart-cities

What smart cities are demanded to think, plan, promote, in the next years on this extremely important topic for our urban quality of life?

How retrofitting programs, on a large scale, could be planned and implemented?

How building renovation could be suitably harmonized with urban substitution?

Which sustainable technologies and smart solutions could match this challenge?

Program

09:30 registration

09:45 opening remarks

Roberto Pagani _ KyotoClub, Smart Cities Working Group

10:00 city retrofit _ innovation to look for

Moderator: Alessandra Merlo

- City retrofit in Italy: learning from demonstration projects _ Gloria Piaggio, City of Genova
- City retrofit in Europe: large scale building retrofit best practice _ Roberto di Giulio, University of Ferrara
- City retrofit in China: lessons to be learnt _ Roberto Pagani, EC2, Beijing, China

11:10 city adaptation _ progress beyond building retrofit

Moderator: Marco Moro _ EdizioniAmbiente

- Infrastructure Solutions _ Milano Expo 2015 (Progetto Enel Distribuzione)
- Technological Solutions _ Marche (LEAF Community _ Loccioni)
- Business Solutions _ Bologna (ESCO_Manutencoop)
- Community Solutions _ Torino (Smart m2 _ Telecom-GTP-Polito)

12:50 conclusions

Gianni Silvestrini _ KyotoClub, Direttore Scientifico
