

Survey for Animation Content

Dear All,

As 44 non-governmental organizations and local administrations working in the field of environmental education, we established the Global Literacy Network (KOZA). Our goal is to strengthen the cooperation in the field of environmental education and contribute to the growth of environmentally literate individuals in Turkey. For this purpose, we organize various activities, including ecological literacy and climate literacy trainings.

This year, we want to develop an animation video for young people over the age of 12 on climate change, environmental sustainability and biodiversity conservation and to spread it digitally. Our aim is to raise awareness on these issues and to encourage behavioral change. We request the support of young climate activists to determine the content of the video.

We would be very happy if you could support us in determining our video content by answering the questions below. There is no right or wrong answer in this anonymous questionnaire.

thank you for your support.

* The "Environmental Literacy Networking Project" is a project implemented by Yuva Association (Turkey) and Kyoto CLub (Italy) within the European Union Civil Society Facility and Media - Support to Civil Society Networks and Platforms in Turkey.

YUVA

1. Year of birth *

2008

2. What do you think are the most important issues regarding climate change around the world?*

The needed changes in our personal behaviours.

3. What do you think are the most important issues regarding environmental sustainability around the world?*

Stop pollution.

4. What do you think are the most important issues regarding preservation of biodiversity around the world?*

Respect the habitats where the other animal species live in.

5. What do you think your peers should know about these problems first?*

They should know that if we don't solve environmental problems, we all risk health problems, increased diseases, as well as living in a less hospitable environment.

6. What do you think your peers should do individually or collectively to solve these problems? *

Save resources and Energy.

7. If you were doing this animation, what message would you like to convey to your peers through animation? *

I would include the respect for the environment we are living in.

8. Which social media tools do you and your peers use the most? *

YouTube; Facebook.

1. Year of birth *

19/05/2008

2. What do you think are the most important issues regarding climate change around the world? *

Pollution.

3. What do you think are the most important issues regarding environmental sustainability around the world?*

Deforestation.

4. What do you think are the most important issues regarding preservation of biodiversity around the world?*

Stop the loss of biodiversity.

5. What do you think your peers should know about these problems first?*

About melting glaciers.

6. What do you think your peers should do individually or collectively to solve these problems?*

To use less water and don't waste it.

7. If you were doing this animation, what message would you like to convey to your peers through animation? *

Polar bears at risk as endangered species.

8. Which social media tools do you and your peers use the most? *

Instagram, face book.

Questi contenuti non sono creati né avallati da Google.

1. Year of birth *

14/6/2008

2. What do you think are the most important issues regarding climate change around the world? *

Global warming.

3. What do you think are the most important issues regarding environmental sustainability around the world?*

Many zero-polluting items could be invented, but, for example, if autonomously going cars (without driver) would be invented, nobody would buy fuel or electricity anymore and there would be no more money income, therefore they do not invent them.

4. What do you think are the most important issues regarding preservation of biodiversity around the world?*

Destruction of the habitats.

5. What do you think your peers should know about these problems first?*

Learning is needed from an early age because it is more difficult to remove a gasoline car from an adult and recommend him to go electric, or by chance from a boy who can choose if he wants it electric, it is easier to teach children than adults.

6. What do you think your peers should do individually or collectively to solve these problems?*

To practice separate waste collection.

7. If you were doing this animation, what message would you like to convey to your peers through animation? *

That you can still save the world.

8. Which social media tools do you and your peers use the most? *

whatsapp, instagram, tik tok, google, youtube

Questi contenuti non sono creati né avallati da Google.

Google Moduli

1. Year of birth *

07/09/08

2. What do you think are the most important issues regarding climate change around the world? *

Toxic gases' emission into the atmosphere, excessive pollution, low recycling, incinerators and landfills.

3. What do you think are the most important issues regarding environmental sustainability around the world?*

There is too much pollution and everyone should do his duty to protect the environment.

4. What do you think are the most important issues regarding preservation of biodiversity around the world?*

Many animals are endangered because of us.

5. What do you think your peers should know about these problems first? *

That the world keeps going because of us and that we must do our best to decrease pollution or the rest that hurts the world.

6. What do you think your peers should do individually or collectively to solve these problems?*

They should respect the environment they live in to safeguard their and other people's lives.

7. If you were doing this animation, what message would you like to convey to your peers through animation?*

I would show what can be actually done to preserve the environment.

8. Which social media tools do you and your peers use the most?*

Tik Tok, Instagram

Questi contenuti non sono creati né avallati da Google.

21-01-2008

2. What do you think are the most important issues regarding climate change around the world? *

Global warming.

3. What do you think are the most important issues regarding environmental sustainability around the world?*

People's behaviour towards the environment.

4. What do you think are the most important issues regarding preservation of biodiversity around the world?*

Stop lighting fires in the woods on purpose.

5. What do you think your peers should know about these problems first? *

That if these problems are not solved there will be major problems and harmful changes for the earth.

6. What do you think your peers should do individually or collectively to solve these problems?*

To recycle, use/buy electric cars, don't waste water.

7. If you were doing this animation, what message would you like to convey to your peers through animation?*

It is important to care for the environment because our relationship with plants and the environment is a circular eco system.

8. Which social media tools do you and your peers use the most?*

Playstation networks, I do not use social media.

What do you think are the most important issues regarding climate change around the world?

*

Melting glaciers and the polluted air we breathe every day.

What do you think are the most important issues regarding environmental sustainability around the world?*

Deforestation leading to wildlife extinction and oxigen decrease, global warming leading to melting glaciers.

What do you think are the most important issues regarding preservation of biodiversity around the world?*

Habitats disappearing, resources' over-exploitation, pollution and climate change.

What do you think your peers should know about these problems first? *

They should know about melting glaciers.

What do you think your peers should do individually or collectively to solve these problems?*

They should start using less water.

If you were doing this animation, what message would you like to convey to your peers through animation?*

Raising awareness about the above-mentioned topics.

Which social media tools do you and your peers use the most?*

instagram and tik tok.

Questi contenuti non sono creati né avallati da Google.

2008

What do you think are the most important issues regarding climate change around the world?

*

The too quick release of greenhouse gases and the continuous CO2 emissions which we must commit to eliminate.

What do you think are the most important issues regarding environmental sustainability around the world?*

The unacceptable food waste: we produce a huge amount of food and there are still a lot of people starving; despite of it, 40% of our the food we produce is wasted even before being used.

What do you think are the most important issues regarding preservation of biodiversity around the world?*

Wildlife and plant life extinction: around one million of animal and plant species are about to disappear forever.

What do you think your peers should know about these problems first? *

They should know all the environmental, biodiversity and sustainability issues.

What do you think your peers should do individually or collectively to solve these problems?*

At first follow simple rules for the daily behaviour, like do not throw around used paper, do not waste food. Later on, they should commit also to respect more complex rules.

If you were doing this animation, what message would you like to convey to your peers through animation?*

Stop forgetting about nature and environment and treating them like they were useless.

Which social media tools do you and your peers use the most?*

Tik Tok.

Year of birth *

2008

What do you think are the most important issues regarding climate change around the world?

*

I can think only of global warming.

What do you think are the most important issues regarding environmental sustainability around the world?*

I think it may be pollution.

What do you think are the most important issues regarding preservation of biodiversity around the world?*

The safeguarding of environments.

What do you think your peers should know about these problems first? *

Some of them should learn first to not throw the waste all around, because bins have been invented for a reason.

What do you think your peers should do individually or collectively to solve these problems?*

Everyone could do a small gesture for our planet, because we are blowing it away with our own hands.

If you were doing this animation, what message would you like to convey to your peers through animation?*

"Help ourselves one another to make the world a better place".

Which social media tools do you and your peers use the most?*

tik tok , netflix, instagram and youtube.

Questi contenuti non sono creati né avallati da Google.

What do you think are the most important issues regarding climate change around the world?

*

Temperature rising and melting glaciers.

What do you think are the most important issues regarding environmental sustainability around the world?*

Waste recycling, biodiversity preservation, deforestation, CO2 emissions.

What do you think are the most important issues regarding preservation of biodiversity around the world?*

Stop destroying the habitat (deforestation, dams, drying out the lakes).

What do you think your peers should know about these problems first? *

We should have more information about what is happening to wildlife and habitats.

What do you think your peers should do individually or collectively to solve these problems?*

We should commit not to pollute, for example by stopping throwing a candy paper on the street.

If you were doing this animation, what message would you like to convey to your peers through animation?*

I would like to pass on the need to be concerned about what could happen in the future and trying to avoid it.

Which social media tools do you and your peers use the most?*

Instagram, tik tok e you tube.

What do you think are the most important issues regarding climate change around the world?

*

People are not aware of climate change and its effect on our life. Our own behaviour should be changed, evolving from users and consumers towards more environmentally sustainable schemes.

What do you think are the most important issues regarding environmental sustainability around the world?*

Nature and its rhythm need to be followed. All activities implying an over-exploiting or damaging the environment should be stopped and humanity should adapt its economic development by following nature and its rhythm.

What do you think are the most important issues regarding preservation of biodiversity around the world?*

Biodiversity should be protected by having more respect for nature and our territory unique features, going against the homogenization caused by technology.

What do you think your peers should know about these problems first? *

They should be analyzed by showing negative effects and what a bad behaviour could lead to.

What do you think your peers should do individually or collectively to solve these problems?*

They should go against all these new ideas that technology and consumerism imposed us. Territorial development on the economic point of view and money and energy investments for a more sustainable way of life could be affordable solutions.

If you were doing this animation, what message would you like to convey to your peers through animation?*

That with small steps taken by everybody great results can be achieved, everyone can and must play his part.
