

ELN (KOZA)

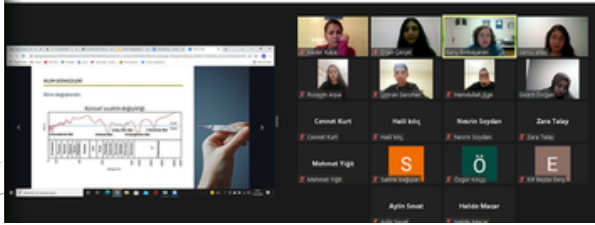

February 2022 Newsletter

The Environmental Literacy Networking Project (ELN) is a network established by Yuva Association and Kyoto Club which brings together non-governmental organizations, civil initiatives and local governments working in the field of environmental education in Turkey and the EU. In this context, we organize dissemination trainings, trainings of trainers, workshops for capacity building etc. [You can visit our website for more information.](#)

ELN DISSEMINATION TRAININGS RESTART

İklim Okuryazarlığı Eğitimi

Eğitime katılan herkese teşekkürler!

Together with our trainers, Dilan Çerçel and Kader Kaya we conducted climate literacy training with Dicle University TOG volunteers on February 11-12. After a pleasant two-day training, the participants who completed the training were handed their participant certificates.

Roots&Shoots (R&S) Turkey, one of ELN members, will disseminate climate literacy training to its network in April. One of our trainers, R&S Turkey member Doruk Karalar will facilitate the training with online tools with the support of other ELN trainers. We wish them an enjoyable learning process. You can always contact us to organize trainings at your organizations.

Our face-to-face trainings, which we have been looking forward to, start as of March. The climate change trainings we will hold at the Museum Gazhane in Istanbul will be with participants aged 13-17 and also be a pilot study of a new training program designed for this age group. We will announce the event dates on the social media accounts of YUVA Association. We will share the details of the program with all our trainers at the ELN Trainers Meeting on Thursday, March 10.

We will implement the first of our Sustainability and Ecological Literacy face-to-face training with adults on March 16, with the students of Beykent University Sociology Community for a full day.

ENVIRONMENTAL AGENDA

A NEW RESEARCH BY CLIMATE NEWS AND KONDA

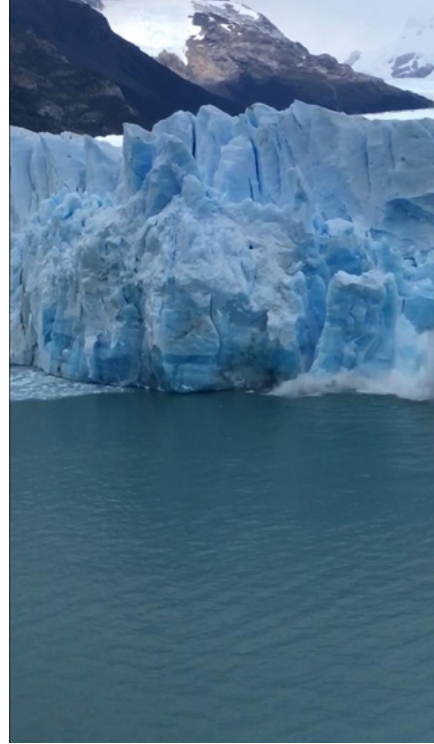

The results of the "Perception of Climate Change and Environmental Problems in Turkey 2021" research conducted by Climate News and KONDA Research have been published. Although the research shows that the awareness of climate change in the country is increasing, it also points out that people's perceptions are shaped by their political views. You can find the report [itself here](#), and its assessment in Climate News [here](#).

NEW REPORT BY THE INTERGOVERNMENTAL PANEL ON CLIMATE CHANGE (IPCC)

The IPCC's "Climate Change 2022: Impacts Adaptation and Vulnerability" report has been published. This report, which is the "Summary for Policy Makers" of the Sixth Assessment Report, examines the effects of climate change on societies and ecosystems based on current data. You can access the report from this [link](#).

NEWS FROM THE MEMBER ORGANISATIONS

ATIKSIZ SEV COMMUNITY VISITED THE WASTE MANAGEMENT FACILITIES OF ISTANBUL METROPOLITAN MUNICIPALITY

Atiksiz Sev Community regularly organizes waste collection activities in Istanbul. This group, which consists entirely of volunteers, continues to work with the dream of not encountering waste while hiking in nature. Atiksiz Sev Group organized a trip to 6 important waste management facilities of IMM on February 23rd, 2022. The trip, attended by 12 people, lasted 7 hours (9.00-16.00). In this trip, it was traced what happened to the garbage that 16 million of population in Istanbul threw into their domestic waste containers. While the community shares its observations from various mediums, they aim to raise awareness of citizens about how their waste can be assessed and how they can reduce their waste.

AN INTRODUCTION TO ERZİNCAN BİNALİ YILDIRIM UNIVERSITY ENVIRONMENT, URBAN AND REGIONAL DEVELOPMENT APPLICATION AND RESEARCH CENTER

The center was established in 2019. It plans and carries out scientific research and application projects on environment, urban and regional development. It aims to be an application and research center open to developing new technologies and ideas. The 20th National Regional Science and Regional Planning Congress of the Turkish National Committee for Regional Science (BBTMK) was held on May 20-22, 2021 and the abstracts of the congress were published in the special issue of the congress. The Center has become a member of ELN and the Junction Network. For more information: <https://ckbkalkinma.ebyu.edu.tr/>

A NEWS FROM IMECE NETWORK

GUS Gruppo Umana Solidarietà's "Plurale Mediterraneo" project was completed with the collaboration of Imece Network. An intercultural calendar and booklet on the Mediterranean has been published. You can visit the links to review.
